I am writing to seek clarification regarding the regulation of screw compressors under 40 CFR 40 Subpart OOOOa. In the reference regulation, EPA issued the "Small Entity Compliance Guide for Oil and Natural Gas Sector: Emission Standards for New, Reconstructed, and Modified Sources". On page 24 of the referenced compliance guide, it states that screw compressors are not Centrifugal Compressors and as a result, they would not be affected facilities. What I am looking for is the explanation of this EPA guidance and why screw compressors are not affected facilities under Subpart OOOOa.
